GROWTH APPETITE

PROPOSAL

Corporate Growth & Business Strategy

PT Bina Auto Solusi (Holding Level Strategy)

ABOUT BINASOL

Multi-Industry Holding Company Empowering B2B, Creative Media & D2C Markets.

PT. BINA AUTO SOLUSI (HOLDING)

Trade & Construction

Role: STABILITY ANCHOR
Focus: Industrial Construction Material Supplier
Target Market: B2B & Government Scale-Up Project

Film & Creative Media

Role: CONTENT & MARKETING SUPPORT
Focus: Film, OTT Series & Digital Media Production
Target Market: Platform Streaming & Audiens Massa

Beauty & Healthcare

Role: PRIMARY GROWTH ENGINE
Focus: Digital Skincare & Health Brand
Target Market: D2C (Direct-to-Consumer) Urban Market

EXECUTIVE SUMMARY

GROWTH APPETITE

CORE CHALLENGE

A key challenge facing corporations today is the optimization of capital allocation. The Construction and Film business lines require capital investment that scales linearly but are subject to significant margin volatility due to their reliance on B2B or third-party projects. In contrast, the Beauty & Healthcare division boasts healthy margins and rapid cash turnover, yet its scalability is constrained by limitations in omnichannel technology infrastructure and in-house R&D capacity.

STRATEGIC ANALYSIS

- **Beauty & Healthcare (Growth Engine):** Projected to lead growth with a 132% surge in revenue, rising from IDR 2.5 billion (2025) to IDR 5.8 billion (2028). This unit boasts a dominant Contribution Margin Ratio (CM Ratio) exceeding 56%, making it the primary driver for boosting corporate profitability.
- **Film & Creative Media (Content Support):** Serves to support in-house marketing and optimize IP product placement, thereby reducing Customer Acquisition Costs (CAC) for the Beauty division.
- **Trading & Construction (Stability Anchor):** Acts as a foundation for baseline cash flow through stable long-term B2B contracts valued between IDR 1.3 billion and IDR 1.5 billion annually.

ACTIONABLE RECOMMENDATIONS

1. **Aggressive Initial CAPEX Implementation:** Allocating an asset investment budget of IDR 340 million in 2025, focused on R&D for a "white-label" 3-in-1 health screening device (IDR 150 million) and the integration of an omnichannel web and POS system (IDR 60 million) to drive direct sales conversions.
2. **COGS Efficiency through Contract Manufacturing Scale:** Reducing variable production costs via long-term contract manufacturing volume agreements to ensure the holding company's gross profit margin rises incrementally from 56.2% to 60.0% by 2028.
3. **Cross-Unit Marketing Synergy:** Mobilizing the film unit to produce low-cost, in-house creative content for digital marketing to support market expansion targets for cosmetics and health supplements.

EXECUTIVE SUMMARY

GROWTH APPETITE

PROSPECTIVE BUSINESS IMPACT

Key Financial Metrics	2025	2026	2027	2028
Total Holding Revenue	IDR 4.80 billion	IDR 5.80 billion	IDR 7.15 billion	IDR 8.90 billion
Beauty Line Contribution (%)	52,1%	55,2%	60,1%	65,2%
Net Profit After Tax	IDR 702 million	IDR 1.08 billion	IDR 1.64 billion	IDR 2.41 billion
Net Profit Margin (NPM)	14,6%	18,6%	23,0%	27,1%
Margin of safety (BEP)	33,3%	41,5%	50,1%	57,9%

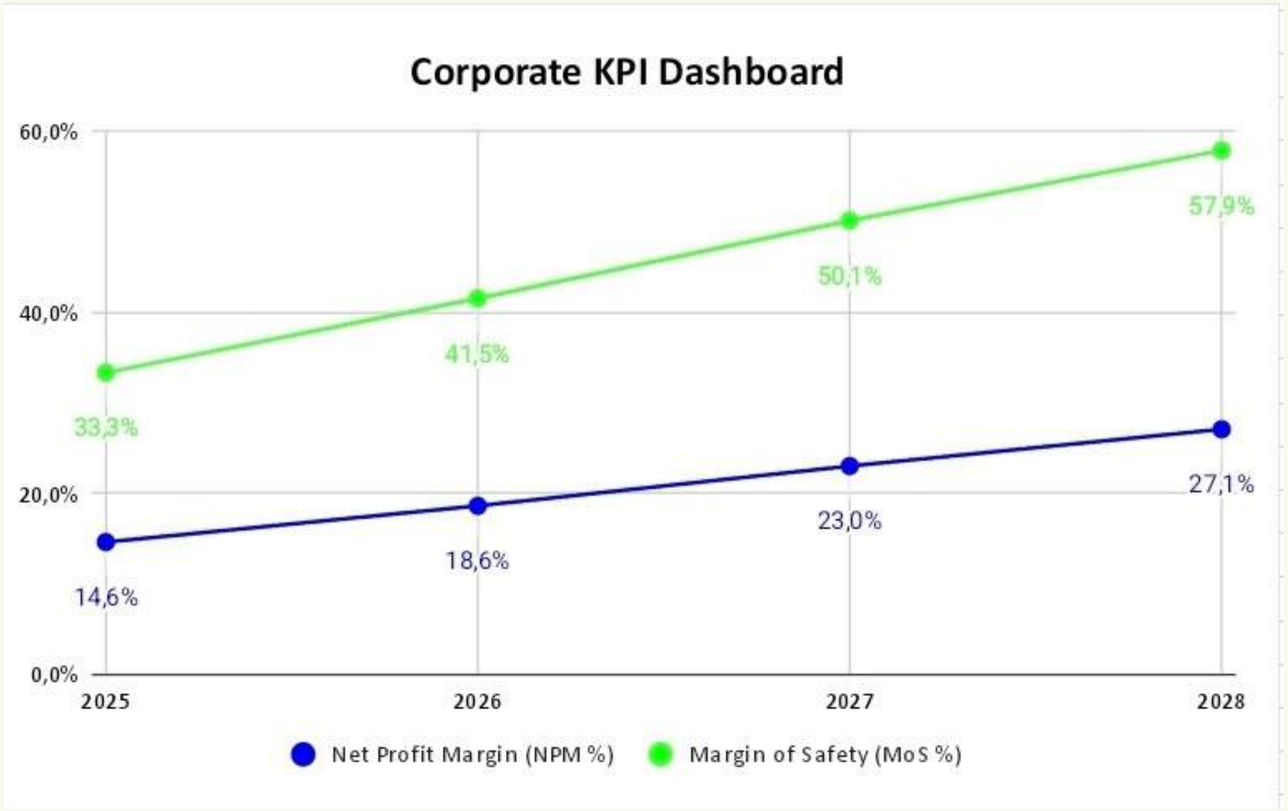

The increased contribution from the Beauty segment significantly boosted the corporation's net profitability (with the net profit margin skyrocketing from 14.6% to 27.1%). Furthermore, this structural strengthening expanded the holding company's margin of safety to 57.9% by 2028, positioning the corporation with an exceptional level of financial security to withstand market fluctuations.

KEY RISKS & MITIGATIONS:

- Execution: Risk: Delay in omnichannel integration. ➡️ Mitigation: Use a ready-to-use white-label SaaS system.
- Market: Risk: High competition in the D2C beauty sector.➡️ Mitigation: CAC efficiency through synergy with the film unit.

Corporate KPI Dashboard

GROWTH APPETITE

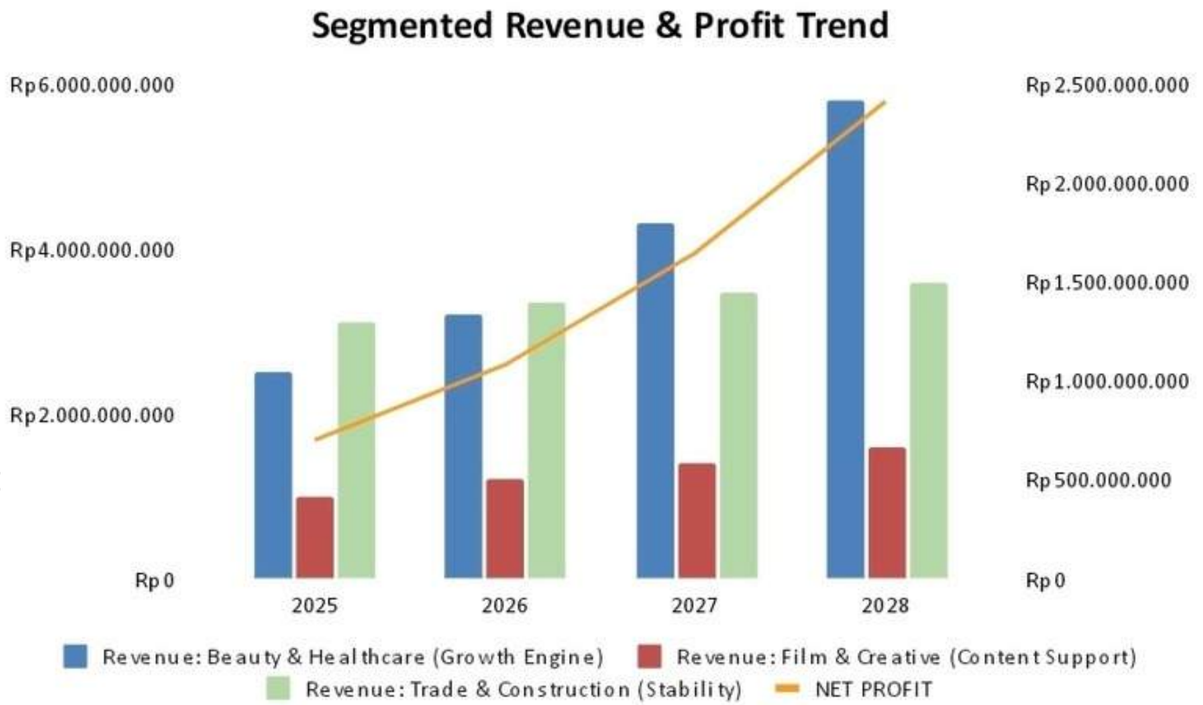

As the contribution of the Beauty & Healthcare division grew to 65.2%, the business group's efficiency improved; this is evidenced by the widening of the Margin of Safety to 57.9%, signifying that the corporation's resilience against the risk of loss—its Capital Risk Buffer—has nearly doubled.

EXPLORATORY DATA ANALYSIS (EDA)

GROWTH APPETITE

1. Growth Rate Analysis (Compound Annual Growth Rate Breakdown)

- **Beauty & Healthcare Division:** Recorded the highest CAGR at 32.38%. This confirms its status as a hyper-growth segment that must be prioritized.
- **Film & Creative Media Division:** Grew steadily with a CAGR of 16.96%, reflecting consistent, moderate performance.
- **Trading & Construction Division:** Exhibited the slowest CAGR at 4.89%. This figure indicates signs of a saturated (mature) market or limitations on linear expansion capacity.
- **Holding Company Net Profit:** Notably, the company's net profit grew at a remarkable CAGR of 50.86%—far outpacing the holding company's revenue growth of 22.85%.

2. Pergeseran Matriks Kontribusi Pendapatan (Revenue Share Drift)

Business Line	2025 Contribution	2028 Contribution	Strategic Direction
Beauty & Healthcare	52,1%	65,2%	Aggressive / Dominant
Film & Creative Media	20,8%	18,0%	Efficiency
Trade & Construction	27,1%	16,9%	Baseline

Insight 1: Net Profit CAGR (50,9%) > Revenue CAGR (22,9%), indicating increasing **operating leverage.** This demonstrates massive cost efficiency (the contract manufacturing effect) as the business group's scale of operations expands.

Insight 2: The holding company is undergoing a structural transition. The Beauty & Healthcare division is assuming a dominant position, accounting for nearly two-thirds (65.2%) of the group's total revenue by 2028. Meanwhile, the holding company's reliance on the capital-intensive Construction sector is decreasing sharply (dropping to 16.9%).

EXPLORATORY DATA ANALYSIS (EDA)

GROWTH APPETITE

3. Risk Correlation vs Buffering (MoS Elasticity Analysis)

When Net Profit Margin data is compared with the Margin of Safety (break-even safety margin), a very strong positive correlation is observed:

- Every 1% increase in the holding company's Net Profit Margin (NPM) correlates with a 1.9% expansion of the margin of safety against market downside risk.
- In 2025, the critical margin of safety level stands at 33.3%. However, as the Beauty segment comes to dominate in 2028, the capital protection figure surges to 57.9%.

Insight 3: This business model becomes significantly safer (**less risky**) precisely as it scales up. The 57.9% safety threshold means the holding company can tolerate a drop in total sales of more than half the target before entering the zone of actual loss.

Bridging to Recommendation

The Beauty division holds the key to the corporation's cost efficiency (operating leverage) and capital safety (margin of safety).

Therefore, the initial capital expenditure (CAPEX) allocation of IDR 340 million was aggressively redirected to this unit to accelerate omnichannel technology penetration and contract manufacturing product research, as data demonstrates that every rupiah invested in this sector yields the highest return multiplier for the holding company.

Strategic Focus

Beauty & Healthcare as Growth Engine

GROWTH APPETITE

Current Situation

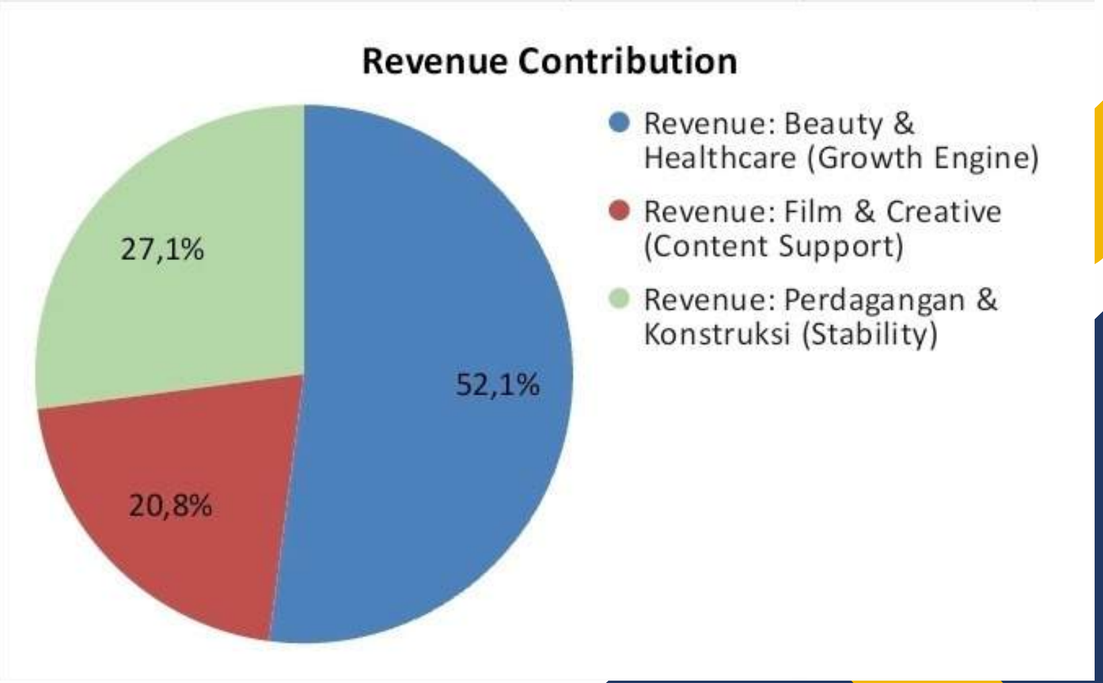

BINASOL's growth is currently stagnant at around 1% per year; therefore, the company needs to determine a focus for accelerating growth.

Strategic Decision

In this business development plan, Beauty & Healthcare is positioned as the holding company's primary growth engine.

Key Reason

- **Highest Revenue Contribution:** The Beauty & Healthcare segment currently generates the highest revenue contribution compared to other units.
- **High Cash Velocity:** Transactions occur daily via e-commerce and marketplaces.
- **Digital Scalability:** The Direct-to-Consumer model enables rapid market expansion through digital platforms.
- **Higher Customer Lifetime Value:** Beauty products drive high repeat purchase rates, thereby increasing customer lifetime value.

Analysis

GROWTH APPETITE

GROWTH APPETITE

Strengths

- **The business encompasses three divisions:** Trading & Construction, the Film Industry, and Beauty & Health Care.
- **Reduces reliance** on a single business line.
- **An extensive partnership network** and a pool of potential partners can generate business growth opportunities.
- **Centralized Operational Structure:** Integration of management systems across units to enhance operational cost and time efficiency.

Weaknesses

- **Uneven Brand Awareness:** The brand lacks a strong, consistent identity in the minds of the market.
- **Risk of Strategic Dilution and High Management Complexity:** The company faces the risk of strategic dilution—spreading its focus too thinly.
- **Unclear Unit Positioning:** The value proposition and unique competitive advantage (Unique Selling Proposition/USP) need to be redefined.

Opportunities

- **Rapid growth of the beauty industry in Indonesia:** Projected to continue expanding at a rate of 9.4% (Statista Market Forecast) over the coming years.
- **Rising health and beauty awareness:** A strategic opportunity for companies to develop products and brand positioning that align with this trend.
- **Dominance of the younger generation in the beauty industry:** Young people account for 54% (75 million) of beauty product buyers (BPS & Populix Consumer Study).

Threats

- **There is fierce competition across all business lines:** the beauty sector sees intense rivalry between local and international brands; the construction sector involves numerous major players and imports; and the film industry features large production houses alongside global OTT platforms.
- **Economic and regulatory fluctuations also play a significant role:** construction projects are heavily dependent on economic conditions and government regulations, while health products require strict regulatory compliance.

Market Segmentation

GROWTH APPETITE

PRIMARY AUDIENCE

Beauty & Health

- Women aged 18–45.
- Residing in major cities or urban areas.
- Interested in health and beauty care.
- Actively seeking safe and reliable solutions to maintain their appearance and physical health.

Construction

- EPC companies, contractors, and construction material distributors requiring high-quality product supplies to support construction projects.
- These entities generally operate in major cities such as Jakarta and Surabaya, handling medium- to large-scale projects.
- They seek reliable, professional vendors capable of meeting project requirements.

Film

- Streaming platform (OTT) companies, production houses, and digital media channels requiring high-quality content production for digital distribution.
- Typically operating in major cities such as Jakarta, Bandung, Surabaya, and Medan.
- And possessing a need to produce content that is commercially appealing and relevant to current trends.

GROWTH APPETITE

PT WIJAYA KARYA (Persero) Tbk

Ideal Customer Persona

PT WIJAYA KARYA

65 years old, located in Jakarta

A state-owned EPC company operating in the construction and infrastructure sectors, undertaking national-scale projects. WIKA prioritizes material quality, timely project delivery, and partnerships with trusted suppliers.

Pain Points :

Pressure to meet tight project completion deadlines, the need for high-quality materials, and the requirement for suppliers capable of ensuring stable stock levels and timely delivery.

Key Messages:

Providing high-quality materials with stable stock availability and fast delivery to support smooth project execution and maintain construction technical standards.

GROWTH APPETITE

Ideal Customer Persona

PT Vidio Dot Com

11 years old, located in Jakarta

A Jakarta-based OTT platform that distributes digital content through subscription and advertising models. Vidio focuses on original content, audience data analysis, and content strategies aligned with market trends to drive engagement and subscriber growth.

Pain Points :

Intense competition among OTT platforms, the need for consistent original content, and the risks associated with high production costs and content that fails to align with market preferences.

Key Messages:

Production of creative, trend-relevant content, managed efficiently to boost audience engagement and support subscriber growth.

Business Model Canvas

GROWTH APPETITE

7.Key Activities

- Research & Development (R&D): Regularly creating innovative beauty and health products.
- Marketing Content Production: Creating educational and entertaining videos.
- Sales Management (Funneling): Managing the customer journey from initial ad exposure to becoming a loyal buyer.

2.Value Proposition

- Self-Care Routine Solution
- Integrated Product Ecosystem
- Content-Based Trust

6.Key Resources

- Brand Assets and Intellectual Property (IP)
- Creative & R&D Teams
- Integrated Data System

Key Partnership

- Manufacturing Partners: Factories supplying quality beauty products and medical devices
- Marketplace & OTT Platforms: Shopee, Tokopedia, and streaming platforms
- Affiliate & Influencer Network: External parties helping to reduce paid advertising costs
- Cosmetics and medical device distributors
- Cosmetics and medical device retail stores

9Cost Structure

- Advertising Cost Efficiency: Minimizing paid advertising expenditure by maximizing organic content from the creative unit.
- Variable Costs: Costs associated with product manufacturing, shipping logistics, and affiliate commissions.
- Strategic Allocation: Profits from the industrial unit are used as initial capital to scale the Beauty unit, which possesses higher growth potential.

1.Customer Segments

- Core Segment (B2C)
- Ecosystem Segment (Affiliates)
- Balancing Segment (B2B)

4.Customer Relationship

- Automated Retention System
- Bundling Program
- Ongoing Community Education

3.Channels

- **Content-to-Commerce & Marketplace**
- **KOL & Affiliate Partnerships:** Network of 500+ beauty nano-influencers and health enthusiasts; **OTT platforms & in-house production**
- **Modern Retail (Omnichannel):** Physical presence at renowned outlets (e.g., Sociolla) to build brand credibility
- **Beauty Salons, Hospitality, Modern Pharmacy Networks**

5.Revenue Streams

- **Daily Revenue (Primary):** Direct sales of beauty and health products
- **Recurring Revenue:** Regular sales of consumables (serums, masks, refills) to existing customers
- **Retail & Affiliate Margins:** Profits from physical stores and cost differentials from the affiliate system
- **Supporting Revenue:** Long-term contracts from industrial units and royalties from film content licensing.

Marketing & Sales Strategy

GROWTH APPETITE

Growth Engine:
Integrated Marketing & Content Strategy

GROWTH APPETITE

AWARENESS (Educational Content)

- ***Focus*:** Product education & problem-based content (e.g., shaving tips, health check routines).
- ***Channels*:** TikTok, IG Reels, Shopee Video.

CONSIDERATION (Social Proof & UGC)

- ***Focus*:** UGC reviews, doctor/expert KOL endorsements, before-after results.
- ***Channels*:** Live Streaming, Affiliate Reviews.

CONVERSION (Offers & Sales)

- ***Focus*:** Promo bundles, limited-time offers, auto-repeat subscription.
- ***Channels*:** TikTok Shop, Shopee Official, Omnichannel Web.

Shopee

B2B Expansion & Partnerships

GROWTH APPETITE

Channel Strategy

- ***Distributor Acquisition:*** Outreach to med-equipment & beauty distributors.
- ***Affiliate Network:*** High-commission structure for TikTok/E-commerce affiliates.
- ***Retail Placement:*** Modern retail stores & pharmacy chain placements.

Key Target Partners & Pipeline

- 🛒 ***Lifestyle Retail:*** OH!SOME, Guardian Indonesia, Dandan
- 📱 ***KOL Affiliate:*** @ka.hairunisa (Beauty & Bodycare Mid-Tier KOL)

Brand Positioning

GROWTH APPETITE

Magic Bean

Self-Care Made Simple | Practical & Painless Grooming

Juragan Medis

Trusted Medical Equipment | Accessible B2C & B2B Clinic Supplies

Elroma

Affordable Premium Scent | Daily Confidence Booster

Product Strategy

GROWTH APPETITE

Product Strategy

Shifting Business Focus Toward Scalable Growth

Steering BINASOL’s business strategy by positioning the Beauty & Healthcare division as the driver of growth, supported by synergies with other business lines.

Business Line Integration Approach

GROWTH APPETITE

Beauty & Healthcare

Growth Driver

Features a scalable Direct-to-Consumer model leveraging marketplaces and live commerce.

Beauty products drive high repeat purchases, thereby increasing Customer Lifetime Value.

Film & Creative

Marketing Support

Supports marketing efforts through creative content production and product storytelling.

In-house content production helps boost brand awareness while reducing reliance on paid advertising.

Construction

Business Stability

Provides business stability through B2B projects and industrial assets owned by the company.

This unit helps maintain financial stability, supporting the development of the Beauty & Healthcare line.

Beauty & Healthcare
Line Strategy

Building a **self-care ecosystem** that transforms products into integrated *lifestyle* solutions.

Product Strategy

- **Self-Care Routine Solution – Magic Bean:** Strengthening its positioning as a safe, painless, and convenient at-home skincare solution offering dual benefits (hair removal and exfoliation).
- **Family Health Shield – Juragan Medis:** Repositioning the brand from a medical equipment retailer to a provider of preventive health solutions for the family.
- **Elroma – Identity Fragrance:** Developing the perfume brand as a form of self-expression, rather than merely a fragrance product.

GROWTH APPETITE

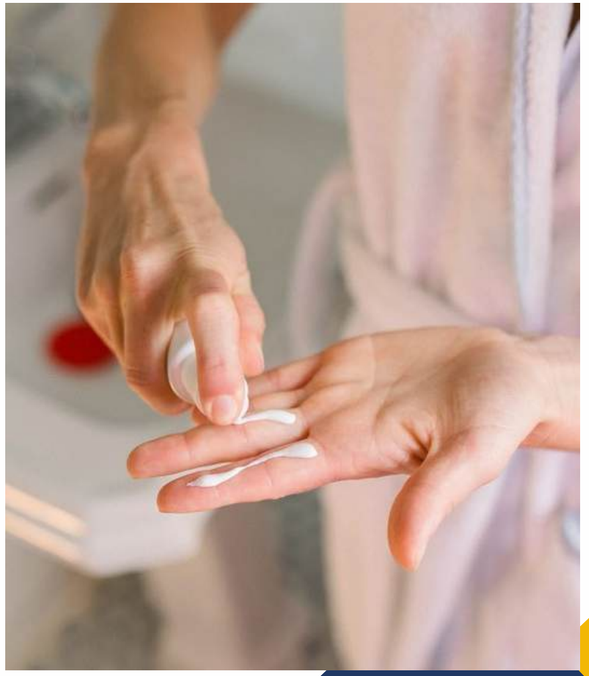

Deep Dive Product Strategy & Business Development

Primary Focus: Business model transformation from one-off product sales to a recurring revenue ecosystem

Product Development Strategy: Contract Manufacturing (Maklon) Scheme & Capital Efficiency

- Accelerate product launches using a contract manufacturing (Maklon) model to safeguard capital and focus on market segments with the highest profit potential.
- **Capital Optimization**: Minimize expenditure on factory infrastructure and machinery. Capital is allocated directly to inventory and promotions.

Magic Bean

Self Care Routine Solution

GROWTH APPETITE

Product Tiering: The Hook & Consumables Model

Integration strategies to build positive product interdependence:

- **Main Device (The Hook):** The Magic Bean shaver serves as an entry-point product to build the user base.
- **Consumables (Recurring Revenue):** Development of a Serum & Soothing Gel line via contract manufacturing. These products are positioned as essentials that complement every use of the device.

Strategic Goal: Customer Lifetime Value (LTV) Optimization

- Repurchase Cycle: Converting one-time device buyers into recurring customers for consumables (serum/gel) every 1–2 months.
- Asset-Light Execution: Partnering with contract manufacturers to produce complementary product lines, thereby maintaining capital efficiency and inventory scalability.
- Retention: Ensuring stable cash flow through an ecosystem business model, reducing reliance on continuous spending for customer acquisition ads.

ELROMA

Identity Fragrance

GROWTH APPETITE

Identity Fragrance Experience

- Offering fragrances that are more than just scents—they are an extension of one's identity and a boost to daily confidence.
-

Market Focus: Female Segment Prioritization

Revenue optimization strategy based on data on the highest purchasing power:

- **High-Spending Segment:** Prioritizing the female segment, as it demonstrates the most stable loyalty and repurchase rates within the beauty industry.
- **Quality Standard:** Developing Eau de Parfum (EDP) formulations with the assistance of expert perfumers to ensure long-lasting quality that meets consumer expectations.

JURAGAN MEDIS

Reliable & Compact Family Health Shield

GROWTH APPETITE

Family Preventive Healthcare

- Providing essential, accurate, and easy-to-use self-care medical devices for family members at home.

Core Product Excellence: Confidential Self-Test Kit

- Maximizing market penetration for an existing flagship product: Self-test kits for HIV and syphilis.
- Value Proposition: Offering high accuracy with a guarantee of complete privacy, providing consumers with the peace of mind to undergo early detection without stigma.

Product Expansion: High-Revenue Medical Devices

Expanding the product portfolio through a contract manufacturing/white-label system to target high-demand categories:

- Family Preventive Healthcare: Providing essential health monitoring devices—such as 3-in-1 blood glucose, uric acid, and cholesterol testers—that are convenient for home use.
- Contract Manufacturing Strategy: Partnering with certified medical device manufacturers to ensure all products hold Ministry of Health distribution permits.

GROWTH APPETITE

Product Structuring
Beauty & Healthcare

- **Level 1 – Hero Product Focus:** Strengthening the penetration of flagship products through digital channel optimization and clear brand positioning.
- **Level 2 – Product Bundling:** Offering complementary packages to enhance value and the consumer experience.
- **Level 3 – Cross-Selling:** Driving synergy between brands through integrated promotions (e.g., a Magic Bean purchase accompanied by an Elroma offer).
- **Level 4 – Reseller & Offline Expansion:** Expanding distribution through reseller partnerships and offline aggregators to broaden market reach.

Synergy Ecosystem

Accelerating Beauty & Healthcare

GROWTH APPETITE

Transforming Support Functions to Reduce Customer Acquisition Cost (CAC) and Strengthen Holding Company Profitability

Film & Creative

- **Strategic Transformation:** Transitioning from a service provider to an Integrated Content & IP Developer.
- **Organic Growth:** Integrating internal brands (Magic Bean, Elroma, Juragan Medis) into films to reduce paid advertising costs.
- **Cost Efficiency:** Ownership of digital assets (Original IP), lowering customer acquisition costs (CAC) in the long term.

Construction

- **Recurring Revenue:** Focus on long-term contracts to ensure stable cash flow for the holding company.
- **Internal Capital:** Project profits are used to finance inventory for Beauty products.
- **B2B Credibility:** A solid track record to facilitate the entry of Juragan Medis medical equipment into the formal sector.

Application of the Ansoff Matrix

GROWTH APPETITE

	Existing Products	New Products
Existing Markets	**Market Penetration** Optimizing sales of existing products (Beauty & Healthcare) by strengthening digital channels and live commerce.	**Product Development** Development of companion products (e.g., a skincare companion for Magic Bean, a new Elroma variant).
New Markets	**Market Development** Penetrating modern retail and beauty aggregators (such as Sociolla/Guardian) to expand physical reach and build consumer trust.	**Diversification** Producing original content as an organic promotional tool to reduce paid advertising costs. Creating a cross-brand ecosystem (Magic Bean, Elroma, Juragan Medis) to dominate the self-care market.

Partnership Strategy

GROWTH APPETITE

Beauty & Healthcare
Digital Trade Sector

Aims to leverage the strengths of the creative business unit (Binasol Pictures) as a key driver of branding efforts to build trust and awareness.

Elroma Parfume	Magic Bean	Juragan Medis
Short Term (The first 0-6 months)	Medium Term (The next 6–18 months)	Long Term (The next 18+ months)

GROWTH APPETITE

Brand Awareness & Market Penetration

(Short Term)

Introducing products to retail and digital markets through third-party credibility.

KOL & Influencer Affiliate Partnership

Form of cooperation

Provision of product samples, a sales-based commission system (affiliate), and the creation of honest review content.

Potential Partner

- Beauty & Grooming Influencers (TikTok/Instagram) for Elroma and Magic Bean.
- Medical Professionals/Health Enthusiasts (Micro-influencers) for Juragan Medis to establish technical credibility.

Implementation Example: Elroma collaborated with 20 perfume vloggers for the “Exclusive Scent at a Competitive Price” campaign, while Magic Bean sponsored “At-Home Self-Care” content for urban women.

GROWTH APPETITE

Strategic Ecosystem Integration

(Medium Term)

Integrating the product into lifestyle and professional operational ecosystems.

B2B Bundling & Cross-Promotion

Implementation Example: A partnership with a national chain of beauty salons or clinics, where every customer using premium services receives a discount voucher for purchasing Magic Bean online.

Form of cooperation

Incorporating Binasol products into partners' service offerings or product packages.

Potential Partner

- Beauty salon or clinic chains: Magic Bean as a hair removal device or a retail product at the checkout counter.
- Modern pharmacies: Juragan Medis as a supplier of disposable medical supplies.
- Hospitality (Boutique hotels): Elroma as reed diffusers or exclusive guest amenities in hotel rooms.

Omnichannel & Market Leadership

(Long Term)

Large-scale expansion and strengthening of the market leader position through cross-industry collaboration.

Co-Branding & Creative Product Placement

Form of cooperation

Special edition product collaborations and product integration into intellectual property (IP).

Potential Partner

- OTT Platforms & Production Houses: Product integration (specifically Elroma & Magic Bean) into films or series produced by Binasol Pictures.
- Marketplace (Official Store Partnership): Exclusive product launch programs on Shopee Mall/LazMall.

Implementation Example: Creating the “Elroma Special Movie Edition,” launched in conjunction with the release of the latest feature film from Binasol Pictures. The product appears organically (product placement) within the film, fostering an emotional connection with the audience.

KPI Framework & Metrics Dashboard Logic

GROWTH APPETITE

KPI PERFORMANCE DASHBOARD

GROWTH APPETITE

Total Revenue Growth Rate	Gross Profit Margin	Beauty LTV:CAC Ratio

Trade & Construction	Retention Rate Contract Value (B2B)	70,0%	75,0%	80,0%	85,0%	%	Cash Stabilizer

Blended Gross Profit Margin = Total Gross Profit / Total Revenue
LTV : CAC Ratio = (Average Order Value × Purchase Frequency × Gross Margin × Lifespan) / CAC

Beauty & Healthcare: As a growth engine with the highest growth target, the ideal LTV-to-CAC ratio is >3× to ensure long-term profitability.

Financial Projection

GROWTH APPETITE

GROWTH APPETITE

Basic Assumptions & Projection parameters

Market Growth

BINASOL targets aggressive annual sales volume growth of 15%–25%, driven by omnichannel optimization and the beauty & healthcare line serving as the primary growth engine, with the highest revenue contribution coming from D2C channels.

Production Model

Utilizing a contract manufacturing system (asset-light execution) to minimize infrastructure costs and accelerate product launches.

CAC Efficiency

Customer Acquisition Cost (CAC) is gradually decreasing by leveraging the Film & Creative business line to produce organic content.

Income tax

An effective corporate tax rate of 22% of earnings before tax (EBT) is assumed.

This business development strategy has not only been conceptually designed but also validated through a dynamic financial model and a prioritization matrix based on impact and ease of execution, making it ready for phased implementation.

Total Costs

GROWTH APPETITE

The following are the capital and operational cost calculations (2025–2028). Production costs are listed separately in the profit and loss statement.

Cost Item Breakdown	2025	2026	2027	2028	Allocation & Strategic Rules
CAPITAL EXPENDITURE (CAPEX)					**Fixed Asset Investment for Line Expansion**
Beauty: R&D of 3-in-1 Health Check Tool	Rp150.000.000	Rp50.000.000	Rp0	Rp0	White Label Hardware & Printing Development
Beauty: Omnichannel Website & POS	Rp60.000.000	Rp20.000.000	Rp15.000.000	Rp15.000.000	E-Commerce Infrastructure & Stock Synchronization
Film: Camera & Studio Upgrade (In-House)	Rp80.000.000	Rp0	Rp50.000.000	Rp0	Improving the Quality of Film Content Production Tools
Construction: Engineering Tools & Safety Gear	Rp50.000.000	Rp30.000.000	Rp30.000.000	Rp20.000.000	B2B Contractual Project Equipment Rejuvenation
TOTAL CAPEX	**Rp340.000.000**	**Rp100.000.000**	**Rp95.000.000**	**Rp35.000.000**	**Total Funding Needs of Parent/Holding Assets**
OPERATIONAL EXPENDITURE (OPEX)					**Fixed & Variable Commitment Operating Expenses**
Consolidated Team Salary & Wage Expenses	Rp850.000.000	Rp920.000.000	Rp980.000.000	Rp1.050.000.000	Employee Scale Adjustment & Annual Increase
Marketing Cost & CAC (Beauty Focus)	Rp450.000.000	Rp500.000.000	Rp550.000.000	Rp600.000.000	Ads, KOL Endorsements, Influencer Marketing

Licensing, BPOM & Halal Certification	Rp120.000.000	Rp60.000.000	Rp80.000.000	Rp40.000.000	New Product Licensing & Periodic Audits
General, Logistics and Administration Costs	Rp180.000.000	Rp260.000.000	Rp270.000.000	Rp330.000.000	Logistics, Stationery, Business Travel & Management
TOTAL OPERATIONAL EXPENSES (OPEX)	**Rp1.800.000.000**	**Rp1.950.000.000**	**Rp2.100.000.000**	**Rp2.250.000.000**	**Total Corporate Fixed Expenses**

GROWTH APPETITE

Revenue Scenario

Comparison of projected revenue based on two financial model scenarios: BINASOL's current model and the recommendations from Growth Appetite.

Growth Scenario	2025 Rev	2026 Rev	2027 Rev	2028 Rev	Risk Definition & Assessment
1. Scenario 1 : Stagnant Growth (Previous Model - 1% Growth YoY)	Rp4.800.000.000	Rp4.848.000.000	Rp4.896.500.000	Rp4.955.000.000	Maklon execution is slowing down, competition is high in the market.
2. Scenario 2 : Acceleration (Portfolio Target - "Active Scenario" of recommendation results)	**Rp4.800.000.000**	**Rp5.800.000.000**	**Rp7.150.000.000**	**Rp8.900.000.000**	**The Beauty line took off thanks to swift omnichannel execution.**
*Note : The financial model on the next sheet uses the parameters of scenario 2 (Base Case).					

Scenario 2 projects steady sales growth in line with the baseline target (15%–25% annual growth). The subsequent table structure will use Scenario 2 as the basis for realistic calculations.

GROWTH APPETITE

Total Revenue Projection

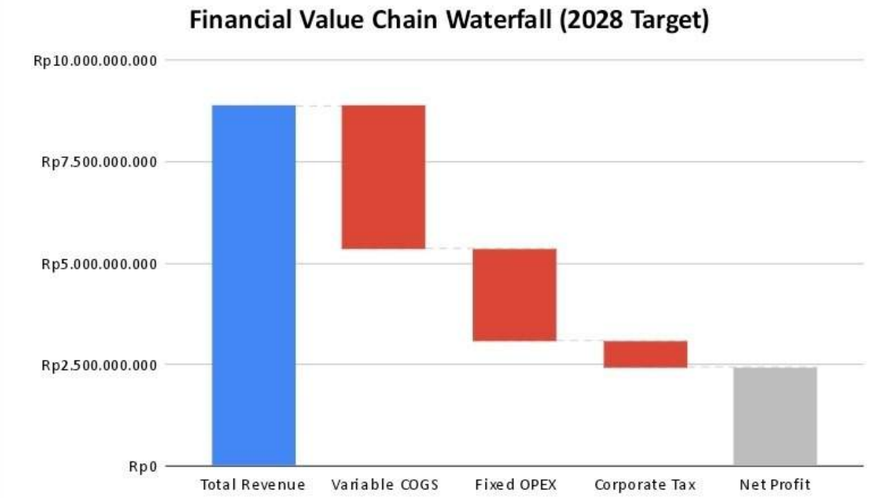

Business Line & Product Component	2025	2026	2027	2028	Trend / Strategic Role
1. Beauty & Healthcare Line					(The Corporation's Main Growth Engine)
- Skincare & Cosmetics (D2C)	Rp1.200.000.000	Rp1.600.000.000	Rp2.300.000.000	Rp3.200.000.000	Direct Sales via E-commerce & Retail
- B2B Maklon/White Label Service	Rp800.000.000	Rp1.100.000.000	Rp1.400.000.000	Rp1.800.000.000	Maklon manufacturing service for other beauty brands.
- 3-in1 health check tool	Rp500.000.000	Rp500.000.000	Rp600.000.000	Rp800.000.000	Sales of skin & health detection devices.
Subtotal Revenue Beauty	Rp2.500.000.000	Rp3.200.000.000	Rp4.300.000.000	Rp5.800.000.000	Grow 132% (Exponential)
2. Film & Creative Media Line					(Content Support & Ecosystem)
- Commercial & Product Placement	Rp600.000.000	Rp700.000.000	Rp800.000.000	Rp900.000.000	Video/advertising production services for exteral clients.
- IP Content & Product Placement	Rp400.000.000	Rp500.000.000	Rp600.000.000	Rp700.000.000	Monetization of internal content and inbound advertising in media.
Subtotal Revenue Film	**Rp1.000.000.000**	**Rp1.200.000.000**	**Rp1.400.000.000**	**Rp1.600.000.000**	Grow 60% (Linear/Stable)
3. Trade & Construction Line					(Cash Anchor)
- Material Supply & Trading	Rp800.000.000	Rp900.000.000	Rp950.000.000	Rp1.000.000.000	Procurement of raw materials & materials for B2B projects.
-Subcontracting Construction Work	Rp500.000.000	Rp500.000.000	Rp500.000.000	Rp500.000.000	The value of construction/ civil engineering work remains constant.
Subtotal Revenue Construction	**Rp1.300.000.000**	**Rp1.400.000.000**	**Rp1.450.000.000**	**Rp1.500.000.000**	Grow 15% (Defensive)
TOTAL REVENUE HOLDING	**Rp4.800.000.000**	**Rp5.800.000.000**	**Rp7.150.000.000**	**Rp8.900.000.000**	Consolidate Turnover of Business Group.
Beauty Line Contribution (%)	52.1%	55.2%	60.1%	65.2%	Portfolio focus is increasingly dominant

Based on the consolidation of BINASOL's three business lines, these projections demonstrate that the Beauty & Healthcare division serves as the growth engine—experiencing a 132% surge in revenue over four years—while the other two divisions act as anchors for the holding company's cash stability.

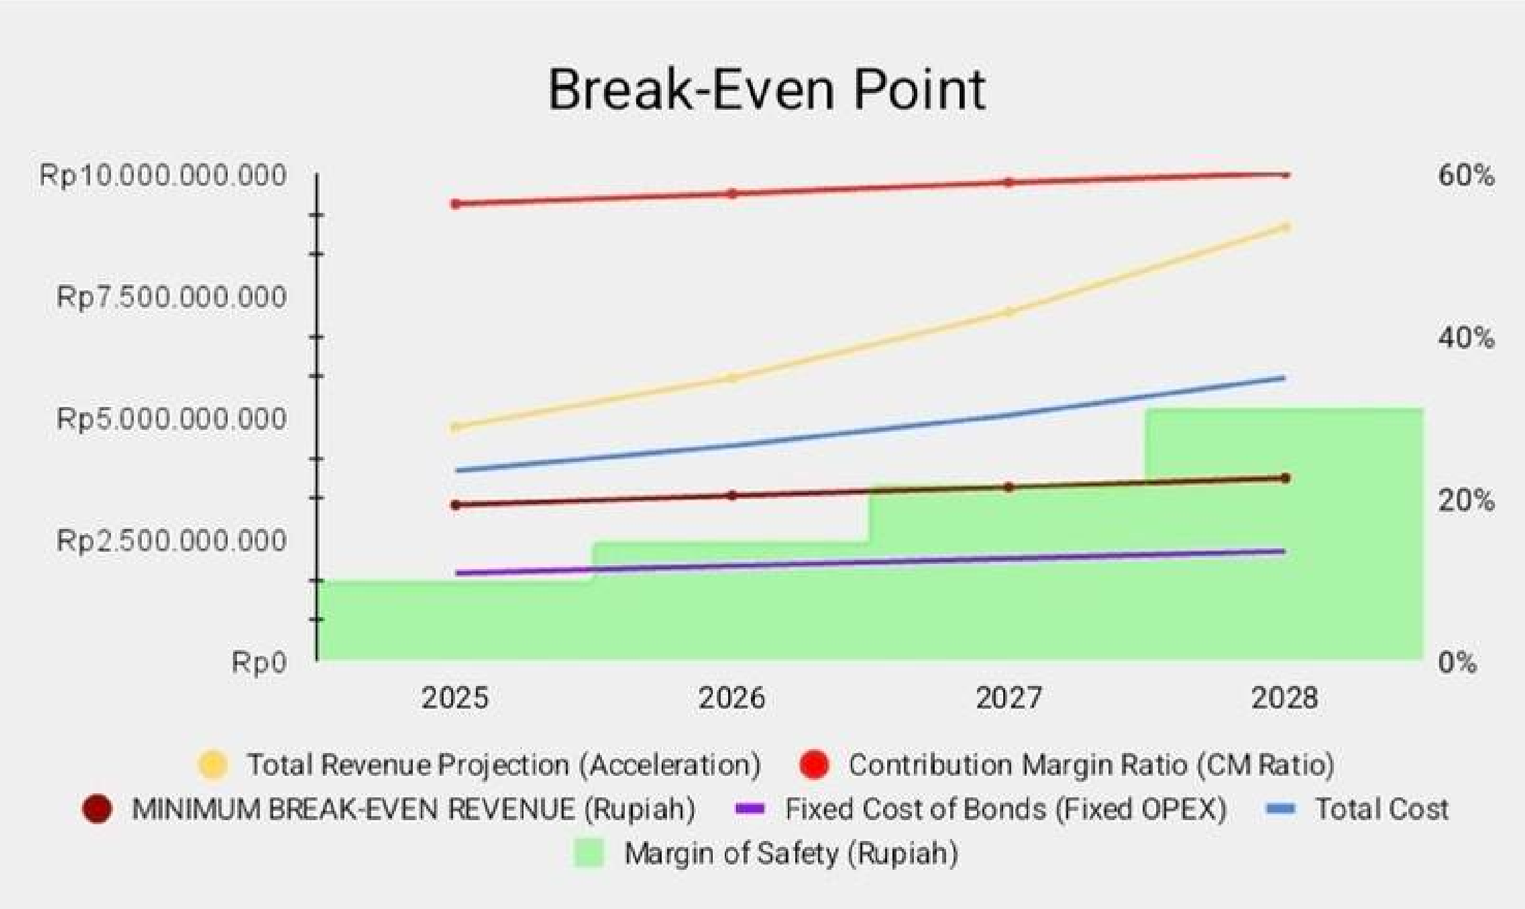

Profit & Loss Projection

Financial Metrics	2025	2026	2027	2028	CAGR / Notes
Revenue: Beauty & Healthcare (Growth Engine)	Rp2.500.000.000	Rp3.200.000.000	Rp4.300.000.000	Rp5.800.000.000	Asset-Light / Maklon Scale
Revenue: Film & Creative (Content Support)	Rp1.000.000.000	Rp1.200.000.000	Rp1.400.000.000	Rp1.600.000.000	In-house Synergy / IP Developer
Revenue: Trade & Construction (Stability)	Rp1.300.000.000	Rp1.400.000.000	Rp1.450.000.000	Rp1.500.000.000	B2B Contractual Anchor
TOTAL REVENUE	**Rp4.800.000.000**	**Rp5.800.000.000**	**Rp7.150.000.000**	**Rp8.900.000.000**	**Calculated Holding Scale**
Cost of Goods Sold (COGS)	Rp2.100.000.000	Rp2.465.000.000	Rp2.940.000.000	Rp3.560.000.000	Maklon Production Efficiency
GROSS PROFIT	Rp2.700.000.000	Rp3.335.000.000	Rp4.210.000.000	Rp5.340.000.000	Gross Profit Before OPEX
Gross Profit Margin (%)	**56,3%**	**57,5%**	**58,9%**	**60,0%**	**Target 56.25% -> 60.0% Efficiency**
OPERATIONAL EXPENSES (OPEX)					**Breakdown detail in the 'CAPEX & OPEX' tab**
Operational Expenses (OPEX)	Rp1.800.000.000	Rp1.950.000.000	Rp2.100.000.000	Rp2.250.000.000	Fixed/Semi-variable Controlled
EARNINGS BEFORE TAX (EBT)	Rp900.000.000	Rp1.385.000.000	Rp2.110.000.000	Rp3.090.000.000	Profit Before Corporate Income Tax
Corporate Tax (22%)	Rp198.000.000	Rp304.700.000	Rp464.200.000	Rp679.800.000	Effective Tax Rate
NET PROFIT	**Rp702.000.000**	**Rp1.080.300.000**	**Rp1.645.800.000**	**Rp2.410.200.000**	**Final Net Profit of Holding**
Net Profit Margin (%)	14,6%	18,6%	23,0%	27,1%	Aggressive Scale Effect

- Revenue shows consistent growth, rising from IDR 4.8 billion (2025) to IDR 8.9 billion (2028).
- Potential for economies of scale or production cost efficiencies (COGS/contract manufacturing). Gross profit margin: 56.25% in 2025 to 60.00% in 2028.
- Operating expenses are well-controlled and primarily fixed or semi-variable in nature, meaning they do not balloon linearly with turnover. Net profit growth significantly outpaces revenue growth.

Margin of Safety Percentage (%)	**33,3%**	**41,5%**	**50,1%**	**57,9%**	**Margin of Safety Rupiah / Revenue**

Analytical justification regarding the financial viability and risk resilience of the holding company, based on consolidated financial modeling designed for BINASOL 2025–2028:

- Accelerating the Beauty Division as a Growth Engine: Segmenting the product lines reveals that the Skincare & Cosmetics (D2C) division boasts the highest profitability, driven by marketing efficiencies supported in-house by the Film & Creative division.
- Break-Even Point (BEP) Viability: The holding company targets an improvement in the Contribution Margin (CM) ratio from 56.3% to 60%. This lowers the group's minimum annual revenue required to reach the break-even point to IDR 3.75 billion by the end of the projection period.
- Margin of Safety Justification: The company’s projected Margin of Safety for 2028 is substantial, standing at 57.9%. Analytically, this provides a strong justification for management to aggressively invest in Beauty-related CAPEX during the initial years (2025–2026), as the business demonstrates high resilience against extreme revenue declines before falling into a loss-making position.

Financial Sensitivity & Scenario Analysis

Stress Testing Profitability Against Market Dynamics (2025–2028)

Base Case (Main Projection)

Situation: **Revenue grew in line with targets (+15–25%), CAC was efficient.**

- Gross Profit Margin: 60.0%
- EBITDA / Net Profit: Healthy Projections (On Track).
- Break-Even: Achieved at IDR 3.75 billion.

Status: Optimized Growth

Revenue Downside (Slowing Revenue Growth)

Condition: **Revenue increased by only +10% (against a target of +18–22%).**

Impact & Results:

- Operating Profit Impact: Net profit declined by 12%–15%, yet the holding company still recorded a positive profit.
- Business Resilience: A substantial Margin of Safety (57.9%) kept the company's financial position above the break-even point (Safe Zone).

Mitigation: OPEX efficiency measures and the deferral of non-priority CAPEX allocations for the Trade & Construction unit.

CAC Surge (Rising Customer Acquisition Cost)

Situation: **Advertising/KOL costs rose, causing CAC to surge by 20%.**

Impact & Results:

- Impact on LTV:CAC Ratio: The LTV:CAC ratio for the Beauty line adjusted from 5.2x to 4.3x.
- Impact on Profitability: The 4.3x ratio remains very healthy (well above the safe industry benchmark of 3.0x), resulting in a gross profit margin erosion of only about 2.5%–3%.

Mitigation: Reallocating ad spend to in-house media production (Film & Creative division) to bring organic acquisition costs back down.

Modeling demonstrates that the holding company's cost structure exhibits strong fixed-cost ratio efficiency. Even under a worst-case scenario, the company continues to operate above the Break-Even Point (BEP) without incurring operational losses.

Risk Management

GROWTH APPETITE

Risk	Probability	Impact	Mitigation Strategy
Fluctuations in Contract Manufacturing Costs / COGS	**Medium**	**High**	Long-term cooperation contracts and diversification of contract manufacturing vendors.
Reliance on KOLs / Affiliates	**High**	**Medium**	Building in-house content engine & owned media channels.
Decline in Demand / Market Trends	**Low**	**High**	A substantial margin of safety (57.9%) provides room for product pivoting.
Regulatory Approvals (BPOM & Halal)	**Low**	**High**	Certification is applied for starting from the initial product R&D stage.

Strategic initiatives & Prioritization Matrix

GROWTH APPETITE

ID	Strategic Initiative	Impact Business Line	Business Impact (1-5)	Ease of Execution	Priority Score (RxE)	Quadrant	Phased Execution
INIT-01	Serum & Soothing Gel Line Launch via Maklon	Beauty & Healthcare	5	4	20	Quick Win	Phase 1: Foundation (0-6 Month)
INIT-02	In-House Product Placement & Content Commerce	Film & Creative	4	5	20	Quick Win	Phase 1: Foundation (0-6 Month)
INIT-03	LinkedIn & Email Outreach Automation (10/week)	Trade & Construction	3	4	12	Quick Win	Phase 1: Foundation (0-6 Month)
INIT-04	B2B Bundling & Cross-Promotion with Salon Chain	Beauty & Healthcare	4	3	12	Major Project	Phase 2: Acceleration (6-18 Month)
INIT-05	White Label Family Medical Device 3-in-1	Beauty & Healthcare	4	3	12	Major Project	Phase 2: Acceleration (6-18 Month)
INIT-06	Co-Branding 'Special Movie Edition' Fragrance	Film & Creative	5	2	10	Strategic Bets	Phase 3: Expansion (18+ Month)
INIT-07	Omnichannel Modern Retail Placement (Sociolla/Guardian)	Beauty & Healthcare	5	2	10	Strategic Bets	Phase 3: Expansion (18+ Month)

Categorization of execution priorities during the strategy initiation phase:

- **Quick Wins** (Low Effort & High Speed): 1. Init-01: Utilizing contract manufacturing (maklon) to accelerate the supply side; 2. Init-02: Generating instant demand without burning cash on outdoor advertising costs; 3. Init-03: Highly feasible execution serving as the most logical first step to secure the company's cash foundation.
- **Major Projects** (High Effort & Long-Term Complexity): 1. Init-04: Building intensive B2B relationships; 2. Init-05: Developing a white-label 3-in-1 medical device, involving a complex process.
- **Stranger Bets** (High Reward, High Risk & High Effort): 1. Init-06: Entirely dependent on film performance; a blockbuster hit would enable the company to successfully achieve highly profitable IP monetization. The film line's brand equity would instantly boost the beauty products' marketability, eliminating the need to build brand awareness from scratch. 2. Init-07: Requires massive capital investment, involves consignment systems and extended payment terms, and entails risks regarding product returns and turnover targets; however, it grants the brand instant credibility while simultaneously unlocking massive sales volume.

Decision Matrix Berbasis

RICE Scoring Model

GROWTH APPETITE

RICE Score = $\frac{\text{Reach} \times \text{Impact} \times \text{Confidence}}{\text{Effort}}$

Business Line	Projection Advantages	Reach (unit/pax)	Impact (0.25-3)	Confidence (%)	Effort (1-5)	RICE Score	Rank	Action
Beauty & Healthcare	Hyper-growth, CAGR 32.38%	15.000	3.0	95%	1.5	28.500	#1	Core Execution (Priority CAPEX)
Film & Creative Media	Stabil, CAGR 16.96%	4.000	1.5	80%	2.5	1.920	#2	Conditional Allocation (Internal Synergy)
Trade & Construction	Mature, CAGR 4.89%	500	0.5	70%	4.5	39	#3	Rationalization / Maintain Baseline

Note: Reach is derived from an estimate of the total addressable customer base. Confidence is based on historical performance and industry benchmarks.

Why Are Beauty & Healthcare the Undisputed Champions?

- Massive reach targeting both B2C and B2B retail markets.
- Impact Scale of 3, as it drives operating leverage that multiplies the holding company's profits.
- Effort Scale of 1.5, as the holding company utilizes contract manufacturing, eliminating the need for heavy capital expenditure on factory infrastructure.

Why Are Trade & Construction at the Bottom?

- Reach in terms of unit volume is very low (based on annual projects).
- The effort scale is 4.5 due to the capital-intensive nature of the business, the requirement for substantial liquidity for bank guarantees, and the high risk of outstanding receivables.

Conclusion: The RICE score clarifies that the holding company's initial working capital (IDR 340 million) will yield the highest efficiency and profit multiplier if allocated 100% to the Beauty & Healthcare division. Diverting funding to the construction division would potentially compromise profit growth by more than 700-fold per unit of effort.

Phased Implementation Roadmap

GROWTH APPETITE

Phase 1: 0–6 Months
Foundation & Quick Wins
(CAPEX-intensive)

- **Beauty & Healthcare:** Launch of a core product portfolio (Magic Bean serum & Elroma soothing gel) via a third-party manufacturing partnership (asset-light contract manufacturing).
- **Film & Creative:** Integration of internal digital assets (original IP) by featuring beauty brands in upcoming film productions to minimize initial marketing costs.
- **Trading & Construction:** Implementation of CRM automation tools and development of a company profile deck to secure business with state-owned infrastructure enterprises.

📌**Main target: CAC Down 15% (via in-house content/film efficiency) | Setup Complete (CRM & Product Catalog ready).**

Phase 2: 6–18 Months
Ecosystem Acceleration & Integration
(Revenue Growth Engine)

- Implementation of a strategic lifestyle ecosystem partnership: B2B bundling with beauty clinic and salon chains.
- Launch of a 3-in-1 home health device via a white-label model to diversify the digital health product line.

📌**Key targets: Revenue growth of +20% QoQ | CM ratio reaching 57–58%.**

Phase 3: 18+ Months
Omnichannel Market Expansion (Maturity & Break-Even Optimization)

- Modern retail penetration (Sociolla, Guardian, Watsons) to strengthen physical presence alongside the digital D2C e-commerce channel.
- Development of a special edition fragrance line (movie-themed co-branding) in collaboration with the holding company's creative unit.

📌**Key target: Retail presence reaching 150+ outlets (Sociolla, Guardian, Watsons) | Margin of Safety maintained at 57.9%.**

Financial & Business Impact Summary

GROWTH APPETITE

No	Strategic Actions	Assumptions	Financial Value Implicated	Key Metrics Affected
1	Accelerating the Beauty & Healthcare Division	• Efficiencies in contract manufacturing costs boosted the Gross Profit Margin (GPM) to 60%. • Revenue for the beauty sector in 2026 is projected at IDR 3,200 million.	+120 Jt	Gross profit margin (GPM)
2	Optimalisasi Sinergi Lini Film & Creative Media	• The average cost of an external creative agency for beauty product branding is IDR 15 million per month (IDR 180 million per year). By bringing this function in-house, the actual internal production cost incurs only an additional IDR 7.5 million per month in operating expenses.	+90 Jt	OPEX
3	Rationalization of the Trading & Construction Division	• Reducing participation in high-risk construction tenders by 30%, which will free up Rp200 million in tied-up liquidity from the banking system.	+200 Jt	Cash Flow

Calculation details:

1. GPM Increase Formula:
   2026 Revenue × (New GPM – Old GPM)
   IDR 3,200 million × (60.00% – 56.25%) = IDR 120 million
   Accumulated additional GPM (2026–2028) totals IDR 498.75 million
2. OPEX savings boosting Holding Net Profit:
   External Agency Costs – Internal Production Costs
   IDR 180 million/year – IDR 90 million/year = IDR 90 million/year
3. Liquidity of IDR 200 million released from the construction sector is reallocated as additional working capital for the Beauty sector, which has a much faster cash turnover.

Consulting Profile & Core Competencies

GROWTH APPETITE

Growth Appetite

Growth Appetite is a strategic consultancy team focused on designing structured and sustainable business growth architectures. We combine data-driven analysis, business model mapping, and cross-unit integration to help companies build scalable and stable growth systems.

Our Services:

Strategic Business Structuring
Formulating the growth trajectory and clarifying the role of each business unit to ensure alignment within an integrated system.

Product & Revenue Architecture
Designing product positioning, value structures, and monetization models to drive sustainable growth.

Integrated Growth Planning
Aligning the brand, distribution, and operational execution so that all business elements move in a single strategic direction.

Lead Generation Strategy

GROWTH APPETITE

Inbound Lead

A. CONSTRUCTION

- Content: Creating "authority content"—producing and distributing useful, informative content to attract the attention and engagement of the target audience and build trust. This can take the form of a PDF, accessible upon providing a name, company, and email address.
- Targets: Developers, Project Managers, Procurement Managers, Engineers.
- Outcome: Generating high-quality leads interested in the product.

B. FILM & OTT PRODUCTION

- Content: Creating a highlight portfolio
- Targets: Production houses, OTT platforms, agencies, brands
- Outcome: Building reputation, attracting potential clients, and generating quality leads

Outbound Lead

A. CONSTRUCTION

Products: Construction materials, fastening systems
Target Audience: Project Managers, Procurement Managers (10 outreach attempts per week)
Strategies:

- LinkedIn outreach via messages and introductions to propose an initial meeting
- Direct email outreach sharing company profiles and product catalogs
- Site visits

B. FILM & OTT PRODUCTION

Products: Filmkolosal, ott series & movies, talent film.
Targets:OTT platforms, Production house, Brand
Strategies:

- Direct pitch ke brand
- Agency Partnership
- Investor Pitch

Brand Positioning Holding

GROWTH APPETITE

Positioning Utama:

“Growing Business Group Across Industrial and Creative Industries”

Brand Perception:

Trusted & Reliable Company

“This company is capable of handling large-scale projects”

To-do list:
Company profile deck (20 slides)
Portfolio
Professional website
Corporate email domain

Multi-industry Expert with Specialized Divisions

Positioning statement for each industry:

- Construction: Trusted Supplier of Industrial Fastening and Construction Support Solutions
- Film & OTT: Professional film and OTT production partner
- Beauty: Providing Beauty and Healthcare Products for Everyday Needs
